Website

Professional Profile

Experienced Full Stack Developer with 14+ years in software development, combining 10+ years of backend expertise with 4 years of frontend integration using React and Vue.js. Adept at building scalable, high-performance web applications and streamlining system architecture. Demonstrated success optimizing backend APIs, enhancing user experience, and reducing costs by up to 40% in telecom and fintech industries.

Technical Skills

- **Backend Development:** C#, .NET Core, ASP.NET, Entity Framework, API Design. Python, Node JS.
- **Frontend Development:** JavaScript, TypeScript, React.js, Next.js, Vue.js, ASP.Net, HTML5, CSS3, Prismic
- **Software Architecture:** Clean Architecture, Domain-Driven Design (DDD), Microservices.
- **API Development:** RESTful APIs, API Gateway, Integration Services.
- **Databases:** SQL Server, MongoDB, Oracle, MySQL.
- **Cloud & DevOps:** Microsoft Azure (Functions, App Services, Blob Storage, Queues), CI/CD, Docker.
- **Security:** OAuth, JWT, Authentication & Authorization.
- **Version Control & Collaboration:** Git, GitHub, Jira, Monday, Scrum.
- **Testing & Quality Assurance:** Unit Testing (xUnit, NUnit).
- **Data & Reporting:** Power BI

Professional Experience

Full-Stack Developer - Tiron Agency

Dubai | August 2025 – September 2025

- Successfully migrated a legacy .NET 4.7 application to .NET 8, improving performance, maintainability, and aligning with modern development practices.
- Implemented Author Pages and BlogCard reusable components in Next.js with TailwindCSS, ensuring scalable and maintainable front-end architecture..
- Designed and configured dynamic routing for content-driven websites integrated with Prismic CMS.
- Collaborated with design teams to translate Figma prototypes into responsive layouts using TailwindCSS and reusable React components.
- Optimized code quality by applying refactors and simplifying data fetching from Prismic's APIs.
- Evaluated CMS alternatives (Prismic vs Payload), providing technical insights on trade-offs, learning curve, and implementation effort.

Consultant Backend Developer – Identidad Technologies

Remote | February 2025 – March 2025

- Designed and implemented a high-throughput message delivery system based on Clean Architecture, increasing scalability and testability.
- Built a producer-consumer architecture using RabbitMQ, Azure Queue Triggers, and MongoDB to support massive SMS campaigns.
- Developed a rate limiting mechanism per company using Redis, ensuring controlled TPS (transactions per second) and preventing overload during large-scale distributions.
- Optimized processing times by partitioning campaign data and managing individual message dispatch flows with delay control and monitoring.
- Structured the project into Core, Infrastructure, and Presentation layers, enabling better separation of concerns and easier onboarding for new developers.
- Created an HTTP microservice integration layer to fetch external company data dynamically before message generation.
- Applied unit testing with mocking to ensure stability of critical components and enabled maintainability through modular service registration and dependency injection.

Senior Developer Team Leader- Identidad Technologies

Bogotá, Colombia | October 2017 – January 2025

- Participated in key architectural decisions for the IADU project, defining the structure and long-term scalability of the system.
- Established foundational best practices and architectural guidelines for both frontend and backend teams, improving collaboration and consistency across projects.
- Led the implementation of an AI-powered chatbot that automated SMS campaign creation, improving operational speed and reducing manual input.
- Architected Apollo, a scalable enterprise platform, reducing operational costs by 40%.
- Enhanced backend system efficiency by 70% through code optimization and improved architecture.
- Led the migration from monoliths to microservices, enabling a 60% increase in client traffic.
- Implemented CI/CD pipelines using Azure DevOps and Docker, cutting deployment time in half.
- Managed a team of 8 developers and ensured code quality through mentoring and agile practices.

Senior Software Developer - Periferia IT

Bogotá, Colombia | May 2014 – September 2017

- Built backend systems for Banco Falabella to streamline financial transactions and improve service reliability.
- Integrated third-party APIs to automate operations, reducing latency and manual workload.
- Designed secure .NET-based applications following industry best practices for the banking sector.

Business Development Specialist - Everis Colombia

Bogotá, Colombia | March 2011 – May 2014

- Developed backend services for Movistar Colombia, improving the support experience across telecom, internet, and TV.
- Promoted from Junior to Senior Developer Analyst in under one year.
- Delivered services compliant with CMMI Level 3, increasing code stability and maintainability.

Certifications

- **Clean Architecture and Domain Driven Design**, Udemy – Aug 2024
- **AI Solutions Developer**, Universidad de los Andes – Jul 2024
- **Professional Python Development**, Platzi – Mar 2022
- **Asynchronism with JavaScript**, Platzi - Mar 2022
- **Concurrency in C#**, Udemy – Jan 2021
- **Advance Vue**, Platzi - Jul 2020

Education

Bachelor's Degree in Systems Engineering - Universidad Industrial de Santander

November 2010

Languages

- **Spanish -** Native
- **English B2 -** Competent in technical communication and documentation

Soft Skills

- Collaborative Leadership
- Effective Communication
- Time Management
- Adaptability to Change
- Critical Thinking
- Team Mentorship
- Problem Solving under Pressure
